

Spring Orchid Show & Sale

The Show was a great success, with lovely displays, many interesting plants to purchase, including carnivorous (orchid companion plants). It was very well attended and CHEK news did a very nice interview with three of our members.

childrenshealthvi.org

The Children's Health Foundation of Vancouver Island once again co-sponsored this event and one of their younger members came to check the show out.

The show featured a silent auction as well as mini-lectures and an abundance of beautiful orchids to look at and to buy.
